WORK EXPERIENCE

Administrator & Junior Web Developer | TopOne Salon Richmond Jan 2017 – Octo 2024

- (Jan 2017 – Sept 2022): Managed salon operations, including budgets, stock management, employee oversight, and pricing strategies.
- (Sept 2022 – Present): Took over technical responsibilities, including maintaining and optimizing the website, troubleshooting, and enhancing user experience through various design and adjustments to the website including the booking forms, increasing online bookings by 22%

Sales Assistant | WHSmith, Richmond & Clapham Sept 2021 – May 2022

- Managed the store independently, overseeing stock, adjusting prices, and fostering strong customer relationships to enhance the in-store experience.

Junior ServiceNow Developer | Sparta Global (Client - HSBC) Octo 2024 – Present

- Supporting production incidents, client tickets, and platform issues within a ServiceNow SPM/TPRM environment, investigating bugs, debugging scripts, and delivering fixes.
- Developing and maintaining ServiceNow functionality using Business Rules, Client Scripts, Script Includes, UI Actions, UI Policies, ACLs, Script Actions, Events, Notifications, Flows, Subflows, and Fix Scripts.
- Working with ServiceNow data structures including reference fields, reference qualifiers, M2M relationships, reference tables, list controls, views, view rules, and data management processes.
- Supporting Workspace and Smart Assessment functionality, including troubleshooting UI behaviour, visibility conditions, declarative actions, related lists, and record-based logic.
- Collaborating with stakeholders and senior developers to understand requirements, investigate production issues, test fixes, and improve platform processes.

EDUCATION

City University of London, England Sept 2019 – Sept 2022 BSc (Hons) Computer Science, Class II Upper Division (2:1)

TECHNICAL SKILLS

- ServiceNow Development: **Business Rules, Client Scripts, Script Includes, UI Actions, UI Policies, ACLs, Flow Designer, Subflows, Events, Notifications, Fix Scripts, Workspace Configuration, Smart Assessments, Reference Qualifiers, View Rules, Related Lists, M2M Relationships, and Production Issue Debugging.**
- **Programming Languages: JavaScript, C#, C++, Java, Python, HTML, CSS, SQL, Type Script**
- Tools & Technologies: **ServiceNow, Git, Visual Studios, IntelliJ, Xampp, Powershell**
